

# It's Learn the Time O'clock

## Day 4

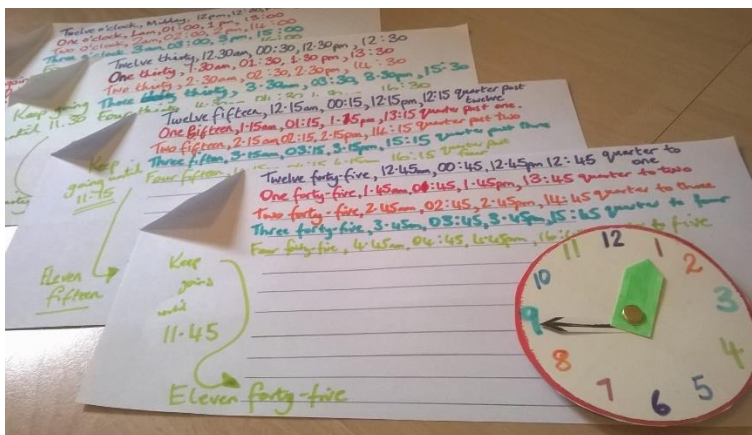

(Continued from Day 58 and Day 59)

Now let's learn to read the clock when it is 'On the quarter to the hour'.

1. Make another clock face, as before.
2. Draw on the long (BIG) hand pointing at the 9.
3. Make another short hand.

(Write '4' on the back)

4. Cut another piece of paper to fit around your container.
5. Now write out all the different ways of writing or saying the time on your paper.

Twelve forty-five

12.45 am

00:45

12.45 pm

12:45

quarter to one

Please carry on up to eleven.

(Write '4' on the back)

Interesting fact:

In the French language we say the hour 'minus' a quarter.

You should now have 4 of everything.

Happy learning!
